

The board of education promotes the health and safety of all students and staff and the cleanliness of all school facilities. The board believes that the use of tobacco products on school grounds, in school buildings and facilities, in or on any other school property owned or operated by the school board, or at school-related or school-sponsored events is detrimental to the health and safety of students, staff and school visitors. To this end, and to comply with state and federal law, the board adopts this tobacco-free policy that prohibits smoking and the use of tobacco products and products that resemble tobacco products as follows. For the purposes of this policy, the term “tobacco product” means any product that contains tobacco and is intended for human consumption, including all lighted and smokeless tobacco products, as well as electronic cigarettes, vaporizers and other electronic smoking devices even if they do not contain tobacco or nicotine. E-cigarettes are covered under this policy for the following reasons: First, state law (G.S. 14-313) prohibits e-cigarette sales to minors. This law defines e-cigarettes as “tobacco products” and includes in the definition any product that contains tobacco and is intended for human consumption. E-cigarettes are vapor products that deliver nicotine which is derived from tobacco. They also are used to mimic cigarettes. Therefore, e-cigarettes are also prohibited on campus and at school related events for students, staff and visitors at all times.

1. All employees and other persons performing services or activities on behalf of the school system, including volunteers and contractors, as well as students and visitors, are prohibited from using any tobacco products at any time in any school building, in any school facility, on school campuses, and in or on any other school property owned or operated by the school board.
2. In addition, persons attending a school-sponsored event at a location not specified in subsection 1 above are prohibited from using tobacco products when (a) in the presence of students or school personnel, or (b) in an area where use of tobacco products is otherwise prohibited by law.
3. Nothing in this policy prohibits the use of tobacco products for an instructional or research activity conducted in a school building, provided that such activity is conducted or supervised by a faculty member and that the activity does not include smoking, chewing or otherwise ingesting tobacco.
4. The administration will consult with the county health department and other appropriate organizations to provide employees with information about support systems and programs to encourage employees to abstain from the use of tobacco products. The school system may, from time to time, provide free non-smoking programs and services to employees of the school system after the regular school day.
5. The principal of each school and other school personnel responsible for school facilities shall post signs in system facilities in a manner and location that adequately notify staff, students and visitors that the use of tobacco products by any person is prohibited at all times in or on school property.

6. The superintendent and designees shall ensure that adequate notice of this policy is provided to students, parents, school personnel, and the public.
7. All school personnel are required to adhere to and enforce this policy and other policies, rules or regulations addressing the use of tobacco products.
