

# Academically or Intellectually Gifted 2022-2023

Thomasville City Schools

# CogAT- Universal Screener

**Purpose of Assessment:** The Cognitive Abilities Test (CogAT) appraises the cognitive development of students by measuring students' learned reasoning abilities in the three symbol systems most closely related to success in school: Verbal reasoning, Quantitative reasoning and Nonverbal reasoning. Scores are used for 3 primary purposes:

1. To guide efforts to adapt instruction to the needs and abilities of students.
2. To provide a measure of each student's level of cognitive development that captures important information not represented in school grades or in other measures of school achievement.
3. To identify students whose predicted levels of achievement are markedly discrepant from their observed levels of achievement.
